

Farah Ben Harb

Cloud & DevOps Engineering Student

benharbfarah85@gmail.com · +216 90 726 464 · Ariana, Tunis · [linkedin.com/in/farah-ben-harb](https://www.linkedin.com/in/farah-ben-harb) · github.com/farah-benharb

Education

Engineering Degree in IT Architecture & Cloud Computing	2022 – Present
ESPRIT – Private Higher School of Engineering and Technology	<i>2nd Year – Cloud Computing Specialization</i>
Scientific Baccalaureate – With Honors, Rue El Attarine High School	2019 – 2022

Professional Experience

Immersion Internship , Ooredoo – On-site	2024 – 2025
- Designed a parser for log file analysis and developed search interfaces with statistical dashboards. - Technologies: Python, Java	
Introductory Internship , Tunisie Telecom – On-site	2022 – 2023
Gained hands-on experience in networking and systems; became familiar with telecom equipment and infrastructure.	

Projects

Private Cloud Infrastructure with OpenStack	<i>2025 – 2026</i>
- Designed and deployed a private cloud infrastructure based on OpenStack with an architecture close to a real production environment. - Implemented a cloud-native architecture based on containerized microservices using Docker and orchestrated with Kubernetes. - Automated and monitored the infrastructure using Ansible, Prometheus, and Grafana for provisioning and observability. - Technologies: OpenStack, Kubernetes, Docker, Ansible, Prometheus, Grafana, Linux, CI/CD	
Cloud CI/CD Pipeline – Automated Deployment on Azure	<i>2026</i>
- Designed and deployed a Dockerized Flask application exposing health check and metrics endpoints for monitoring. - Implemented a CI/CD pipeline with GitHub Actions including automated tests with Pytest, Docker image build, and publishing to Docker Hub. - Automated deployment to an Azure Linux virtual machine using Terraform and a self-hosted GitHub Actions runner. - Integrated an observability stack with Prometheus, Grafana, Alertmanager, node_exporter, cAdvisor, and blackbox_exporter for application, system, and container monitoring. - Technologies: Flask, Python, Pytest, Docker, GitHub Actions, Docker Hub, Terraform, Azure VM, Prometheus, Grafana, Alertmanager, Linux	
Agricultural Management – Intelligent Web Platform	<i>2025</i>
- Developed a web platform connecting farmers, suppliers, and customers. - Technologies: Symfony, Java, Python	
AI Chatbot – AI IHEC Hackathon	<i>2024</i>
- Developed a chatbot based on an LLM via Hugging Face with fine-tuning and user interface integration. - Technologies: Python, Hugging Face, NLP	

Skills

Programming Languages: C, C++, Python, Java, PHP, JavaScript, Qt, Bash Cloud & DevOps: AWS, OCI, Azure, OpenStack, Docker, Kubernetes, Terraform, Ansible, CI/CD, Prometheus, Grafana Web & Mobile: Flutter, Android, HTML5, CSS, Symfony Networking & Security: CCNA, VPN, Firewalls, Multicloud Tools: Linux, Git, GitHub, GitHub Actions, Docker Hub, VMware	
--	--

Certifications

• AWS Cloud Practitioner	2024
• Oracle Cloud Infrastructure Foundations Associate	2024
• Multicloud Network Associate	2024
• CCNA: Switching, Routing and Wireless Essentials	2023
• Introduction to Modern AI	2024

Languages

Arabic (native), French (B2), English (B2), Spanish (A1)

Social Activities

Active Member , IEEE ESPRIT Student Branch	2023 – Present
Participated in technical workshops and seminars; contributed to organizing conferences on Cloud Computing and AI.	
Hackathon Competitor	2023 – 2024
Participated in several national hackathons, including AI IHEC 2024; developed AI solutions in a team under time constraints.	
Environmental Volunteer	2022 – Present
Participated in community initiatives focused on sustainable development awareness and waste reduction.
