

Farah Ben Harb

Cloud and DevOps Engineering Student

benharbfarah85@gmail.com | +216907264646 | Ariana, Tunis | [linkedin.com/in/farah-ben-harb](https://www.linkedin.com/in/farah-ben-harb) | github.com/farah-ben-harb

Education

Engineering Cycle in IT Architecture and Cloud Computing

ESPRIT - 2022 to present - Second-year student specializing in Cloud Computing. Expected graduation: 2027.

Scientific Baccalaureate with Honors

Lycee Rue El Attarine - 2019 to 2022.

Professional Experience

Ooredoo - Immersion Internship

2024 - 2025

- Designed a parser for log file analysis and built search interfaces with statistical dashboards.
- Technologies: Python, Java

Tunisie Telecom - Introductory Internship

2022 - 2023

- Gained hands-on experience in networking and systems while working with telecom equipment and infrastructure.

Selected Projects

Private Cloud Infrastructure with OpenStack

2025 - 2026

- Designed and deployed a private cloud infrastructure modeled after a production-like environment.
- Built a cloud-native architecture with Docker containers orchestrated by Kubernetes.
- Automated provisioning and observability with Ansible, Prometheus, and Grafana.
- Technologies: OpenStack, Kubernetes, Docker, Ansible, Prometheus, Grafana, Linux, CI/CD

Cloud CI/CD Pipeline - Automated Deployment on Azure

2026

- Built a containerized Flask application with health and metrics endpoints.
- Created a GitHub Actions pipeline with Pytest, Docker image publishing, and automated deployment.
- Provisioned an Azure Linux VM with Terraform and integrated Prometheus, Grafana, Alertmanager, node_exporter, cAdvisor, and blackbox_exporter.
- Technologies: Flask, Python, Pytest, Docker, GitHub Actions, Docker Hub, Terraform, Azure VM, Prometheus, Grafana, Alertmanager, Linux

Intelligent Agriculture Platform

2025

- Developed a web platform connecting farmers, suppliers, and customers.
- Technologies: Symfony, Java, Python

AI Chatbot - AI IHEC Hackathon

2024

- Built an LLM-based chatbot with Hugging Face fine-tuning and a user-facing interface.
- Technologies: Python, Hugging Face, NLP

Skills

- Programming: C, C++, Python, Java, PHP, JavaScript, Qt, Bash
- Cloud and DevOps: AWS, OCI, Azure, OpenStack, Docker, Kubernetes, Terraform, Ansible, CI/CD, Prometheus, Grafana
- Web and Mobile: Flutter, Android, HTML5, CSS, Symfony
- Networking and Security: CCNA, VPN, Firewalls, Multicloud
- Tools: Linux, Git, GitHub, GitHub Actions, Docker Hub, VMware

Certifications

- AWS Cloud Practitioner - 2024
- Oracle Cloud Infrastructure Foundations Associate - 2024
- Multicloud Network Associate - 2024
- CCNA: Switching, Routing, and Wireless Essentials - 2023
- Introduction to Modern AI - 2024

Languages

Arabic (native), French (B2), English (B2), Spanish (A1)

Activities

- Active member of IEEE ESPRIT Student Branch since 2023.
- Hackathon participant across 2023-2024, including AI IHEC 2024.
